

How To Get Reviews?

Our policy is simple just **Give And Take** – just review other apps/websites, and you will be awarded a Review for your app/website.

How we work?

On our website, many users from around the world add their apps/websites for review; just review their app/website. If the app owner accepts your Review then you will be awarded a point. **After earning a point you will be able to add your app/website for Review.** Other users will provide you review as per your requirements.

Guideline for writing proper review:

Follow **each and every guideline** for writing a proper review like how the app/website owner wants you to write the review. Like, give only female Reviews **if the app/website owner wants female reviews for a ladies hair salon.** For complete details, go to <https://goo.gl/K1Smr5>

- Always **mention keywords** in your review.
- Always give **five star ratings** in your review.

For example:
